

```
/*:
## Exercise – Ternary Operator

Refactor the code below so that `largest` is declared and assigned to in one
line using the ternary operator.
*/
let number1 = 14
let number2 = 25

var largest: Int

largest = number1 > number2 ? number1 : number2

/*:
[Previous](@previous) | page 8 of 9 | [Next: App Exercise – Ternary
Messages](@next)
*/
```
